27 Subdivision and Development

27.1 Purpose

Subdivision and the resultant development enables the creation of new housing and land use opportunities, and is a key driver of the District's economy. The council will support subdivision that is well designed, is located in the appropriate locations anticipated by the District Plan with the appropriate capacity for servicing and integrated transportation.

All subdivision requires resource consent ~~as a discretionary activity~~ unless specified as a permitted activity. It is recognised that subdivisions will have a variable nature and scale with different issues to address. Good subdivision design, servicing and the management of natural hazards are underpinned by ~~logic and~~ a shared objective to create healthy, attractive and safe places.

Comment [RC1]: Consequential amendment as a consequence of changes to rule framework.

Comment [RC2]: Submission 383.47

Good subdivision creates neighbourhoods and places that people want to live or work within, and should also result in more environmentally responsive development that reduces car use, encourages walking and cycling, and maximises access to sunlight.

Good subdivision design will be encouraged by the use of the ~~QLDC Land Development and Subdivision Code of Practice, and the~~ QLDC Subdivision Design Guidelines 2015. The Subdivision Design Guidelines 2015 includes subdivision and urban design principles and outcomes that se-are-guiding-principles-to give effect to the objectives and policies of the Subdivision and Strategic Directions Chapters, in both designing and assessing subdivision proposals. Proposals at odds with these documents are not likely to be consistent with the policies of the Subdivision and Strategic Directions chapters, and therefore, may not achieve the purpose of the RMA. The purpose of the QLDC Land Development and Subdivision Code of Practice is to provide a best practice guideline for subdivision and development infrastructure in the District.

SUBDIVISION and DEVELOPMENT 27

Except where specific provisions are provided to assess subdivision, such as the Rural, Gibbston and Rural Lifestyle Zones, ~~t~~The subdivision chapter is the primary method to ensure that the District's neighbourhoods are quality environments that take into account the character of local places and communities.

Infrastructure upgrades necessary to support subdivision and future development are to be undertaken and paid for by subdividers and developers in accordance with the Council's 10 Year Plan Development Contributions Policy.

27.2 Objectives and Policies – district wide

27.2.1 **Objective - Subdivision will create enable quality environments that ensure the District is a desirable place to live, visit, work and play.**

Policies

27.2.1.1 Require subdivision infrastructure to be consistent with the QLDC Land Development and Subdivision Code of Practice constructed, and designed to an appropriate standard that and is fit for purpose, while recognising opportunities for innovative design.

Comment [RC3]: Officer suggested amendment given that Code of Practice refers specifically to 'subdivision infrastructure'

Comment [RC4]: Submission 248.9, 567.16, FS1117.225, 806.170, 632.6, 806.171

27.2.1.2 Support To enable subdivision that is consistent with the QLDC Subdivision Design Guidelines 2015, recognising that good subdivision design responds to the neighbourhood context and the opportunities and constraints of the application site.

27.2.1.3 Require that allotments are a suitable size and shape, and are able to be serviced and developed to the anticipated land use of the applicable zone.

27.2.1.4 Where m-Discourage non-compliance with minimum allotment sizes are not proposed to be achieved, however where minimum allotment sizes are not achieved consideration will be given to whether the extent to which any adverse effects are mitigated or compensated by achieving providing:

- i. desirable urban design outcomes.
- ii. greater efficiency in the development and use of the land resource.
- iii. affordable or community housing.

27.2.1.5 The Council recognises that there is an expectation by future landowners that the effects and resources required of by anticipated land uses will have been resolved through the subdivision approval process.

Comment [RC7]: Submission 453.13

27.2.1.6 Ensure the requirements of other relevant agencies are fully integrated into the subdivision development process.

27.2.1.7 Recognise there will be certain subdivision activities, such as boundary adjustments, that are undertaken only for ownership purposes and will not require the provision of services.

27.2.1.8 Avoid subdivision of a residential flat from a residential unit, except where it can be demonstrated that the subdivision will not result in an increase in the level of non-compliance with the standards of the underlying zone.

SUBDIVISION and DEVELOPMENT 27

~~27.2.1.9 Avoid the subdivision of land resulting in the division of a residential building platform.~~

27.2.2 **Objective - Subdivision design achieves benefits for the subdivider, future residents and the community.**

Policies

27.2.2.1 Ensure subdivision design provides a high level of amenity for future residents by aligning roads and allotments to maximise sunlight access.

27.2.2.2 Ensure subdivision design maximises the opportunity for buildings to front the road.

27.2.2.3 ~~Locate~~ Open spaces and reserves ~~are located in appropriate locations~~ having regard to topography, accessibility, use and ease of maintenance, ~~while ensuring these areas~~ and are a practicable size for their intended use.

27.2.2.5 Subdivision design will integrate neighbourhoods by creating and utilising connections that are easy and safe to use for pedestrians and cyclists and that reduce vehicle dependence within the subdivision.

27.2.2.6 Encourage innovative subdivision design that responds to the local context, climate, landforms and opportunities for views or shelter.

27.2.2.7 Encourage informal surveillance of streets and the public realm for safety by requiring that the minority of allotments within a subdivision are fronting, or have primary access to, cul-de-sacs and private lanes.

27.2.2.8 ~~Encourage~~ Promote informal surveillance for safety ~~by ensuring through overlooking of~~ open spaces and transport corridors ~~from are visible and overlooked by~~ adjacent sites and dwellings and by effective lighting.

Comment [RC17]: Grammatical change as a consequence of submission 632.60

Policies

27.2.3.1 Acknowledge that small scale subdivision, (for example subdivision involving the creation of fewer than four allotments), and infill subdivision where the subdivision involves established buildings, might have limited opportunities to give effect to policies 27.2.2.4, 27.2.2.65 and 27.2.2.87.

27.2.3.2 While acknowledging potential limitations, encourage small scale and infill subdivision to:

- i. Ensure lots are shaped and sized to allow adequate sunlight to living and outdoor spaces, and provide adequate on-site amenity and privacy;
- ii. Where possible, locate lots so that they over-look and front road and open spaces;
- iii. ~~Where possible, a~~Avoid the creation of multiple rear sites, ~~unless except where~~ this is not practicable;
- iv. Where buildings are constructed with the intent of a future subdivision, encourage site and development design to maintain, create and enhance positive visual coherence of the development with the surrounding neighbourhood;
- v. Identify and create opportunities for connections to services and facilities in the neighbourhood.

Policies

27.2.4.1 Enhance biodiversity, riparian and amenity values by incorporating existing and planned waterways and vegetation into the design of subdivision, transport corridors and open spaces.

27.2.4.2 Ensure that subdivision and changes to the use of land that result from subdivision do not reduce the values of heritage items and protected features scheduled or identified in the District Plan.

SUBDIVISION and DEVELOPMENT 27

Comment [RC29]: Submission 719.134

Comment [RC30]: Officer suggested amendment given that Code of Practice is based on 'potential' demand not expected.

SUBDIVISION and DEVELOPMENT 27

For the purposes of this policy, reference to 'potential traffic levels' refers to those traffic levels anticipated by the zoning of the District Plan.

Water supply, stormwater, wastewater

- 27.2.5.6 All new lots shall be provided with connections to a reticulated water supply, stormwater disposal and/or sewage treatment and disposal system, where such systems are available or should be provided for.

SUBDIVISION and DEVELOPMENT 27

Water

- 27.2.5.7 Ensure water supplies are of a sufficient capacity, including fire fighting requirements, and of a potable standard, for the anticipated land uses on each lot or development.
- 27.2.5.8 Encourage the efficient and sustainable use of potable water by acknowledging that the Council's reticulated potable water supply may be restricted to provide primarily for households' living and sanitation needs and that water supply for activities such as irrigation and gardening may be expected to be obtained from other sources.
- 27.2.5.9 Encourage initiatives to reduce water demand and water use, such as roof rain water capture and use and greywater recycling.
- 27.2.5.10 Ensure appropriate water supply, design and installation by having regard to:
- i. The availability, quantity, quality and security of the supply of water to the lots being created;
 - ii. Water supplies for fire fighting purposes;
 - iii. The standard of water supply systems installed in subdivisions, and the adequacy of existing supply systems outside the subdivision;
 - iv. Any initiatives proposed to reduce water demand and water use.
- 27.2.5.11 Ensure that the provision of any necessary additional infrastructure for water supply, stormwater disposal and/or sewage treatment and disposal and the upgrading of existing infrastructure is undertaken and paid for by subdividers and developers ~~in accordance with the Council's 10 Year Plan Development Contributions Policy.~~

Stormwater

- 27.2.5.12 Ensure appropriate stormwater design and management by having regard to:
- i. ~~Recognise and encourage~~ **Viable** alternative design for stormwater management that minimises run-off and recognises stormwater as a resource through re-use in open space and landscape areas;
 - ii. The capacity of existing and proposed stormwater systems;
 - iii. The method, design and construction of the stormwater collection, reticulation and disposal systems, including connections to public reticulated stormwater systems;
 - iv. The location, scale and construction of stormwater infrastructure;
 - v. The effectiveness of any methods proposed for the collection, reticulation and disposal of stormwater run-off, **including opportunities to maintain and enhance water quality through**, ~~including~~ the control of water-borne contaminants, litter and sediments, and the control of peak flow.

Comment [RC37]: Officer suggested amendment to improve policy.

Comment [RC38]: Submission 632.49

SUBDIVISION and DEVELOPMENT 27

27.2.5.13 The Council will support subdivision design that includes the joint use of stormwater and flood management networks with open spaces and pedestrian/cycling transport corridors and recreational opportunities where these opportunities arise, provided maintenance and operation requirements are acceptable to Council if the assets are to be vested.

For the purpose of this policy, term 'acceptable to Council' means that any system shall be appropriate from a Council maintenance and operation perspective and shall be fit for purpose once vested. Where land is to be vested as reserve, Council will ensure that the open space area is of a sufficient size, gradient and surface to be useful, and can be maintained at a reasonable cost to the Council.

Comment [RC40]: Officer suggested amendment

Wastewater

27.2.5.14 Treating and disposing of sewage is provided for in a manner that:

i. is consistent with maintaining public health; and

ii. avoids or mitigates adverse effects on the environment in the first instance; and

iii. Where effects on the environment cannot be reasonably avoided, effects shall be minimised to an extent that is proportionate to the level of significance of the effects.

Comment [RC41]: Submission 632.50

27.2.5.15 Ensure appropriate sewage treatment and disposal by having regard to:

- i. The method of sewage treatment and disposal;
- ii. The capacity of, and impacts on, the existing reticulated sewage treatment and disposal system;
- iii. The location, capacity, construction and environmental effects of the proposed sewage treatment and disposal system.

27.2.5.16 Ensure that the design and provision of any necessary infrastructure at the time of subdivision takes into account the requirements of future development on land in the vicinity.

Energy Supply and Telecommunications

27.2.5.17 To ensure adequate provision is made for the supply and installation of reticulated energy, including street lighting, and communication facilities for the anticipated land uses while:

- i. Providing flexibility to cater for advances in telecommunication and computer media technology, particularly in remote locations;
- ii. Ensure the method of reticulation is appropriate for the visual amenity and landscape values of the area by generally requiring services are underground and in the context of rural environments where this may

SUBDIVISION and DEVELOPMENT 27

not be practicable, infrastructure is sited in a manner that does not adversely impact upon visual amenity and landscape values of the receiving environment;

- iii. Have regard to the design, location and direction of lighting to avoid upward light spill, recognising the night sky as an element that contributes to the District's sense of place;
- iv. Generally require connections to electricity supply and telecommunications systems to the boundary of the net area of the lot, other than lots for access, roads, utilities and reserves. Where the subdivision provides for a residential building platform the proposed connections to electricity supply and telecommunications systems shall be established to the residential building platform.

Easements

27.2.5.18 Ensure that services, shared access and public access is identified and managed by the appropriate easement provisions.

27.2.5.19 Ensure that easements are of an appropriate size, location and length for the intended use of both the land and easement.

27.2.6 **Objective - Cost of services to be met by subdividers.**

Policies

27.2.6.1 In accordance with Council's 10 Year Plan Development Contributions Policy, R require subdividers and developers to meet the costs of the provision of new services or the extension or upgrading of existing services (including head works), that are attributable to the effects of the subdivision or development, including where applicable:

SUBDIVISION and DEVELOPMENT 27

27.2.7 Objective - Create esplanades where opportunities arise.

Policies

27.2.7.1 Create esplanades reserves or strips ~~where opportunities exist, particularly where the subdivision would provide nature conservation, natural character, natural hazard mitigation, infrastructural or recreational benefits is of large-scale or has an impact on the District's landscape.~~ In particular, Council will encourage esplanades where they:

Comment [RC44]: Submission 632.55

- i. are important for public access or recreation, would link with existing or planned trails, walkways or cycleways, or would create an opportunity for public access;
- ii. have high actual or potential value with regard to the maintenance of indigenous biodiversity;
- iii. comprise significant indigenous vegetation or significant habitats of indigenous fauna;
- iv. are considered to comprise an integral part of an outstanding natural feature or landscape;
- v. would benefit from protection, in order to safeguard the life supporting capacity of the adjacent lake and river;
- vi. would not put an inappropriate burden on Council, in terms of future maintenance costs or issues relating to natural hazards affecting the land.

27.2.7.2 Avoid reducing the width of esplanade reserves or strips, or the waiving of the requirement to provide an esplanade reserve or strip, except where the following apply:

- i. safe public access and recreational use is already possible and can be maintained for the future;
- ii. it can be demonstrated that a full width esplanade reserve or strip is not required to maintain the natural functioning of adjoining rivers or lakes;
- iii. a reduced width in certain locations can be offset by an increase in width in other locations or areas, which would result in a positive public benefit in terms of access and recreation.

27.2.7.2 27.2.7.3 To use opportunities through the subdivision process to improve the level of protection for the natural character and nature conservation values of lakes and rivers, as provided for in Section 230 of the Resource Management Act 1991.

SUBDIVISION and DEVELOPMENT 27

Comment [RC46]: Submission 383.48

Policies

- 27.2.8.1 Enable minor cross-lease and unit title subdivision of existing units without the need to obtain resource consent where there is no potential for adverse effects associated with the change in boundary location.
