

DATA QUALITY STATEMENTS

PROPERTY DATA

The property data has been sourced from land information New Zealand (LINZ) and is current as at Feb 2011. The boundary data has been compiled from various existing surveys of different ages. Boundary lengths shown as calculated may vary from those shown on the Certificate of Title, and are subject to a legal redefinition survey. The accuracy of the boundary data is estimated to be within 30mm.

SURVEY DATA

Surveyed data has been captured using survey equipment, to a relative accuracy within approximately 30mm (horizontal and vertical).

SERVICES DATA

The locations of underground services have been compiled from records supplied by the local Council and Utility Authorities. Where those services have features visible on the surface, their positions have been verified by field survey. The accuracy of unverified services is unknown. Also there may be services for which no records were provided and which are not shown on this plan. In all cases, if the location of a service is considered important, the relevant service provided should be consulted.

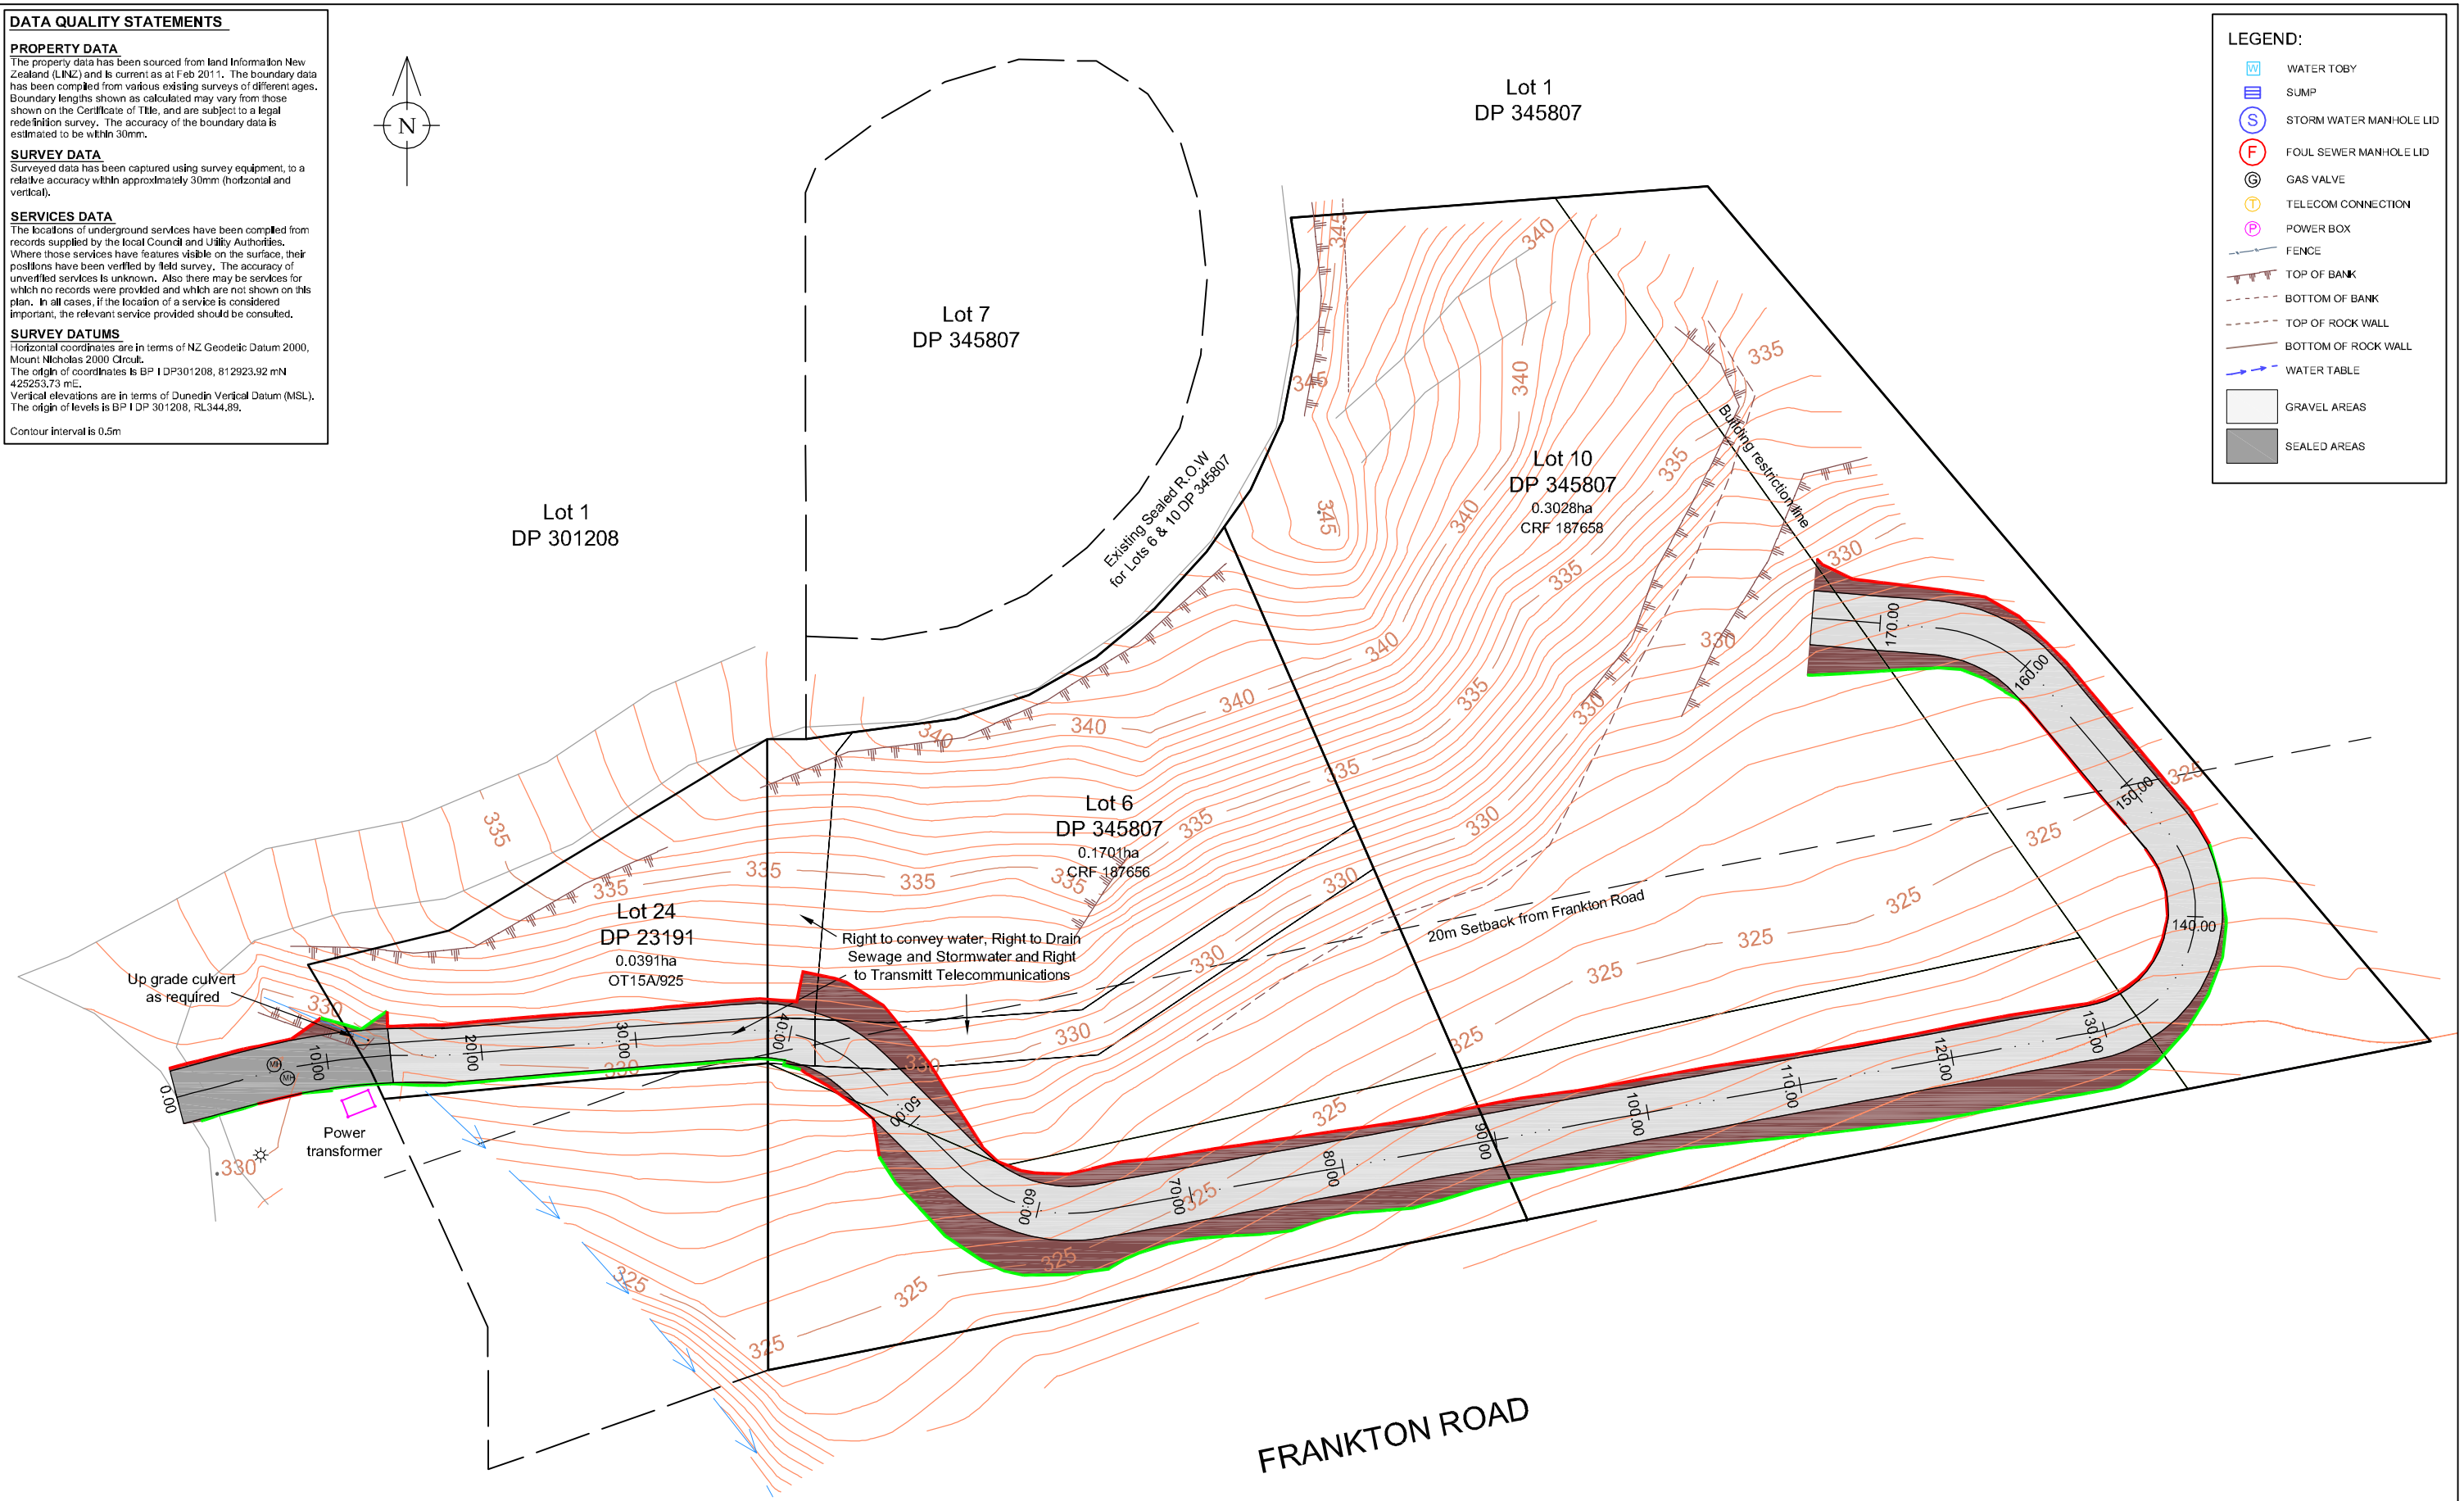

SURVEY DATUMS

Horizontal coordinates are in terms of NZ Geodetic Datum 2000, Mount Nicholas 2000 Circuit.
The origin of coordinates is BP 1 DP301208, 812923.92 mN 425253.73 mE.
Vertical elevations are in terms of Dunedin Vertical Datum (MSL).
The origin of levels is BP 1 DP 301208, RL344.89.
Contour interval is 0.5m
