

Form 18

Notice of requirement by Minister, local authority, or requiring authority for designation or alteration of designation.

To: Queenstown Lakes District Council (Territorial Authority)

In accordance with Clause 4 of the First Schedule of the Resource Management Act 1991 the Queenstown Lakes District Council ("QLDC") (Requiring Authority) gives notice of requirement for the creation of new a designation for a public work in respect of land where a restriction is necessary for the safe or efficient functioning or operation of a public work.

SITE TO WHICH THE REQUIREMENT APPLIES:

Proposed Designation # 534 – Recreation Reserve

The purpose of the proposed Designation # 534 is a Recreation Reserve – Glenorchy Village Green. The subject sites already exist and are located off Mull Street and Argyle Street, Glenorchy. The subject sites are legally described as Lot 5 DP 12433 and Lots 1 and 2 DP 12433.

The subject sites are depicted below:

Figure 1 – Subject Sites are numbers 33 and 35 Mull Street and number 29 Argyle St. Source – QLDC Website 23.03.15

The overall cover letter for the Designations Chapter work includes a web link which will enable interested parties to view this change on the proposed planning maps.

The purpose of this proposed Designation is to formally identify the QLDC's reserves and associated facilities for which they are financially responsible for.

Specifically, the proposed Designation will enable QLDC to clearly identify the affected land to the community through the District Plan text and planning maps and will offer certainty regarding the expectations for use of the land.

Further, the proposed designation will enable QLDC to undertake future works on the identified reserve and without necessitating a land use consent.

The Designation will also formally restrict any other party from carrying out work on the subject site that could prevent or hinder the continued use of the reserve without the requiring authorities' permission.

POTENTIAL EFFECTS ON THE ENVIRONMENT:

The incorporation of these landholdings into a formal Designation within the District Plan will result in negligible potential adverse effects on the environment. As identified above, the subject site already exists and is being utilised for its proposed purpose.

The writer has not been made aware of any issues with the existing operation of the subject site for their proposed purpose.

The proposed change is essentially a change on paper (Planning Maps) only as opposed to a change in use of the land, and simply highlights the existence of and importance of the land and its continued use for a village green.

As the proposed Designation is a Reserve for Recreation it is considered appropriate that the conditions for Recreation Reserves contained in Part B of the Designations Chapter of the District Plan should apply to this Designation.

Such a requirement will afford the community some certainty over the potential for the sites use including bulk and location of future buildings, details on surfacing, lighting (glare), noise and hours of operation.

Accordingly, a condition is proposed requiring the designated land to comply with the conditions in B. of the draft Designations Chapter. As such, the potential adverse effects on the environment are considered to be less than minor.

ALTERNATIVE SITES:

As identified above, the subject site proposed to be designated as a Recreation Reserve already exists.

Accordingly, there are no viable alternatives that could be considered.

THE PROPOSED ALTERATION/NEW DESIGNATION IS REASONABLY NECESSARY FOR ACHIEVING THE OBJECTIVES OF THE REQUIRING AUTHORITY BECAUSE:

The key objective of the requiring authority in relation to this notice is to ensure that the Designation adequately provides for the on-going use of the land as a Recreation Reserve, and allows for the maintenance, upgrade or construction of existing and future proposed facilities associated with the reserves purpose without necessitating further land use consents.

In addition, the designation will afford the community a clear expectation of the level of effects that may be generated from the continued use of the subject sites.

CONSULTATION:

The Requiring Authority is the landowner. As the proposed landholdings currently exist and are being used for their proposed designated purposes, no consultation has been undertaken as part of the preparation of this notice. The Designation as proposed will be available for public submissions when the Proposed District Plan is publicly notified.

Signed for the Queenstown Lakes District Council by Sean Dent
Resource Management Consultant
