

WE ALL HAVE A PART TO PLAY

Keep rubbish and recycling areas clean, tidy and covered to prevent contaminants leaking out

Scrape food waste from plates and bowls into the bin before washing
(This will help maintain your grease trap)

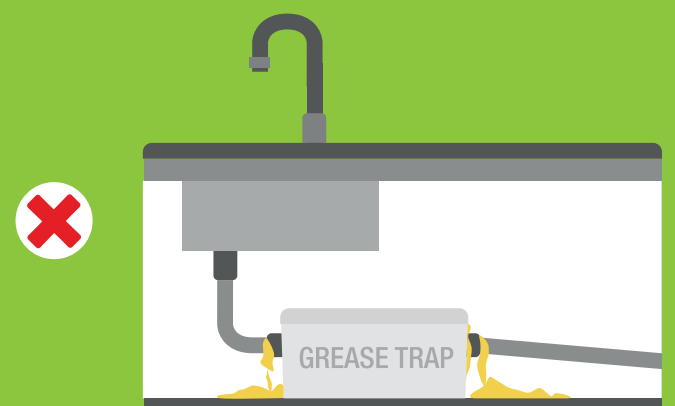

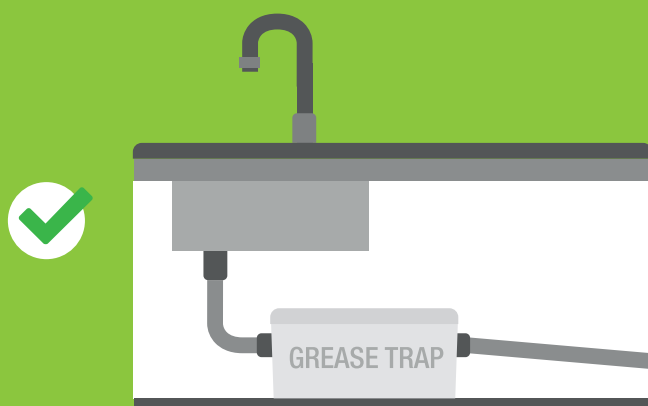

Recycle cooking oil
(Recycled cooking oil containers must be banded to prevent spilt oil from discharging to the storm water network)

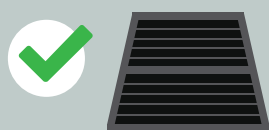

Use environmentally preferable cleaning products that will have the least effect on the environment

If using a grease trap, clean and maintain this regularly
(This is to ensure grease levels comply with the QLDC Trade Waste Bylaw)

Use a broom to sweep up rubbish and cigarette butts and keep the area around stormwater drains clean and tidy

Help keep our lakes, rivers and environment clean
